I. Basis of the report**1. With regard to the elements of the international application:***☐ the international application as originally filed☒ the description:

pages (See Attached) _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____

☒ the claims:

pages (See Attached) _____, as originally filed
pages _____, as amended (together with any statement) under Article 19
pages _____, filed with the demand
pages _____, filed with the letter of _____

☒ the drawings:

pages (See Attached) _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____

☒ the sequence listing part of the description:

pages (See Attached) _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language _____ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
☐ the language of publication of the international application (under Rule 48.3(b)).
☐ the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in printed form.
☐ filed together with the international application in computer readable form.
☐ furnished subsequently to this Authority in written form.
☐ furnished subsequently to this Authority in computer readable form.
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☒ The amendments have resulted in the cancellation of:

- ☒ the description, pages NONE
☒ the claims, Nos. NONE
☒ the drawings, sheets/fig NONE

5. ☐ This report has been drawn as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17).

**Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. statement**

Novelty (N)	Claims <u>1-189</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-189</u>	NO
Industrial Applicability (IA)	Claims <u>1-189</u>	YES
	Claims <u>NONE</u>	NO

2. citations and explanations (Rule 70.7)

Claims 1-189 lack an inventive step under PCT Article 33(3) as being obvious over Hendricks (WO 95 15649) in view of Barney et al. (US 5,341,426) and Wreford-Howard.

Considering claims 1, 130 and 144, Hendricks discloses a method and corresponding apparatus for encrypting electronic books for delivery between two or more parties and comprising:

- a) supplying electronic book (pages 6-8);
- b) supplying encrypted electronic book (see the entire document including but not limited to page 8, lines 32-34, page 10, lines 9-14, page 11, lines 3-11, figures 3 & 4);
- c) decrypting the encrypted electronic book (page 19, line 30 and figure 12, step 832); and wherein
- d) the electronic book is delivered to a second party (262 or 266) from a first party (208 or 250).

However, Hendricks fails to specifically disclose encrypting and decrypting keys and verifying that the second party received the electronic book as recited in the claims.

Barney discloses various types of encryption and decryption keys and techniques for providing secure communication between a central facility and terminals. See the entire document including but not limited to figures 1-3 and the corresponding text.

Wreford-Howard discloses transmitting data to a second party from a first party and verifying that the second party received the data for the advantage of ensuring that the second party received the data. See column 1, lines 5-10 and column 2, lines 5-27.

It would have been obvious to one of ordinary skill in the art to modify Hendricks' system to include encryption and decryption keys, as taught by Barney, for the advantage of providing secure communication between a central facility and terminals.

Additionally, it would have been obvious to one of ordinary skill in the art to modify the combined systems of Hendricks and Barney to include verifying that the second party received data such as an electronic book, as taught by Wreford-Howard, for the (Continued on Supplemental Sheet.)
